Diagnosis, Treatment and Outcomes of Pediatric Septic Shock

Message from the Guest Editors

Pediatric septic shock remains a major cause of morbidity and mortality, and hemodynamic instability and multiple organ failure can rapidly complicate the clinical course of critically ill children, so alertness and prompt interventions on behalf of healthcare providers may prove to be life-saving. Unstable hemodynamics and cardiovascular dysfunction seem to determine outcomes in sepsis. The aim of this Special Issue is to gather and share recent knowledge on the diagnosis, management, and prognosis of pediatric septic shock. Manuscripts addressing diagnostic and prognostic tools for sepsis, as well as treatment approaches for managing these challenging situations, are particularly welcome. We also welcome manuscripts of reviews or original articles, that focus on novel approaches to pediatric septic shock. Contributions from basic science research are also encouraged. We eagerly anticipate receiving your submissions and sharing them with our scientific community.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
