Pediatric Overweight and Obesity: The Role of Physical Activity, Nutrition, and Educational Interventions

Message from the Guest Editors

We invite you to contribute to Special Issue “Pediatric Overweight and Obesity: The Role of Physical Activity, Nutrition, and Educational Interventions”. This Special Issue aims to gather the latest research on the prevention and management of pediatric overweight and obesity. We encourage submissions that explore the role of physical activity and exercise in promoting healthy weight, as well as studies on the impact of nutritional interventions, public health policies, and educational programs. We are particularly interested in research addressing the comorbidities associated with pediatric obesity and psychological wellbeing. Additionally, innovative approaches to behavior change and long-term health promotion are welcome. This Special Issue seeks to advance the understanding and management of pediatric overweight and obesity through integrated health approaches.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
