Special Issue

Pediatric Infectious Disease Epidemiology

Message from the Guest Editors

Infectious diseases remain the leading cause of morbidity and mortality among children worldwide. The COVID-19 pandemic significantly altered seasonal patterns and incidence rates of various pediatric infectious diseases. Notably, vaccine-preventable diseases like measles have reemerged in many regions. This Special Issue, "Pediatric Infectious Disease Epidemiology", aims to explore the evolving trends, epidemiological characteristics, and impact of childhood infections on public health. We invite original research articles and reviews that address infectious diseases in children and adolescents, with topics including but not limited to the following:

- Pediatric infectious diseases and their epidemiology;
- Disease surveillance and outbreak patterns;
- Epidemiological methodologies;
- Public health interventions for infectious disease and control strategies.

Your contributions will enhance our understanding of infectious disease epidemiology and dynamics in children and adolescents across diverse settings. We encourage researchers to submit their work to advance knowledge in this crucial area of public health.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.
