Palliative Care for the Youngest: Hot Topics in Perinatal and Neonatal Palliative Care across the Globe

Message from the Guest Editors

From the millions of children across the world with paediatric palliative care (PPC) needs, neonates and infants make up a large subgroup in many countries. These children often have diagnoses linked with a short life span, leading to death within the first year of life. In this Special Issue, we aim to address the following questions: Palliative care for the youngest—what are the advances in screening for PPC needs? How has the population changed over the last 1–2 decades? How have advances in medical technology affected this change? How can parents be guided in the decision-making process beginning at diagnosis? What role does prognosis play in counselling families? What must specialised PPC offer expectant/young mothers? How does specialised PPC for the youngest differ between countries? Are there new insights into symptom management? We hope to provide clinicians additional evidence of and insights into the care of these patients and their families through a broad interdisciplinary selection of authors.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
