Special Issue

Pediatric Pain Rehabilitation

Message from the Guest Editor

This Special Issue offers a unique opportunity to contribute to a state-of-the-art series on the rehabilitation of pediatric pain from early childhood to late adolescence, including but not limited to the following major areas: cancer pain and pain in childhood cancer survivors, musculoskeletal pain, postsurgical pain, pain in young athletes, visceral pain, pain in rheumatic disorders, and pain in neurological disorders. I am delighted with the initiative by Children to launch this Special Issue. Children's 2019 Journal Impact Factor is 2.078, and it is ranked 50 out of 128 journals in the category of Pediatrics. We welcome submissions from all pediatric pain experts—clinicians and researchers-around the world to submit their work for consideration in this Special Issue. Manuscript formats can vary from literature reviews (systematic literature reviews and meta-analyses or narrative reviews) to original research (clinical trials, cohort studies, experimental lab work, case-control studies), as long as they are of high quality and advance the pediatric pain rehabilitation field.

Guest Editor

Dr. Kelly Ickmans

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.
