

## Special Issue

# Ischemic Stroke in Children

### Message from the Guest Editors

The occurrence of arterial ischemic stroke (AIS) in children is undoubtedly a serious medical problem. AIS results from a multifactorial background in both children and in adults. However, etiologic mechanisms of childhood AIS differ from those observed in adulthood stroke. Particular attention, both in terms of the occurrence of the first incident of cerebral ischemia and possible recurrences in children, should be paid to the arteriopathy of cerebral vessels, especially focal cerebral arteriopathy of childhood (FCA). Genetic risk factors may be also involved in childhood AIS etiology, as indicated by the age of patients. Moreover, the importance of genetic factors in the etiology of stroke in pediatric patients has been confirmed by studies carried out among pairs of monozygotic twins, in which stroke occurred almost five times more often than in twin dizygotic pairs. Previously, several meta-analyses of our authorship regarding the role of particular genetic polymorphisms in the development of childhood AIS were conducted.

### Guest Editors

Dr. Beata Sarecka-Hujar

Department of Basic Biomedical Science, School of Pharmacy with the Division of Laboratory Medicine, Medical University of Silesia in Katowice, 41–200 Sosnowiec, Poland

Dr. Ilona Kopyta

Department of Pediatric Neurology, School of Medicine in Katowice, Medical University of Silesia in Katowice, 40–752 Katowice, Poland

### Deadline for manuscript submissions

closed (20 November 2021)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
