

Special Issue

Research on Pediatric Trauma Surgery

Message from the Guest Editors

Despite effective preventive measures, injury continues to be the leading cause of death and disability in children older than one year of age. The spectrum of injury causes varies with age, and blunt forces cause the majority of injuries. For this Special Issue, current research topics on various aspects of pediatric trauma are welcome. Our aim is to present and discuss the latest developments in the management of thoracic and abdominal trauma, head injury, orthopedic trauma, including spine and pelvic injury, non-accidental trauma, and minimally invasive techniques to treat trauma patients. Manuscripts pertaining to patient management in the prehospital state and the trauma bay, as well as contributions dealing with anesthesiologic aspects of pediatric trauma care, are also welcome. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
