Short- and Long-Term Outcomes of Central Nervous Systems in Pediatric Patients

Message from the Guest Editor

There is a knowledge gap in the literature about the short- and long-term outcomes of children with different types of central nervous system infections, in line with the age of diagnosis of an infection. Through reviews and original papers, this Special Issue aims to improve our knowledge about short-term outcomes and sequelae in children with central nervous system infections.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
