Comprehensive Care of Critically Ill Infants and Children: An Update

Message from the Guest Editors

The landscape of Pediatric Critical Care Medicine has undergone a remarkable transformation in recent decades, allowing infants and children to survive illnesses and injuries previously associated with a poor outcome.

The Pediatric Intensive Care Unit (often abbreviated as PICU) is a hospital area dedicated to the care of critically ill infants, children, adolescents, and in some cases, young adults. Collaboration between experts in pediatric critical care medicine has promoted the creation of important guidelines. These and other important guidelines are periodically revised and updated, and adapted to locally available resources. Specialized pediatric intensive care units have also appeared, the first of which focused on the perioperative care of children with congenital heart disease.

Dr. Andrea Ontaneda and I invite you to submit expert, evidence-based original research articles, clinical review articles, special articles, and illustrative case reports to this Special Issue. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
