Septic Arthritis and Related Conditions

Message from the Guest Editors

Septic arthritis in pediatrics is a true emergency, requiring prompt diagnosis and treatment in order to avoid adverse sequelae in the growing skeleton. However, this condition may present with an indolent course and vague features, making it difficult to easily identify. Many different diseases should be considered in the differential diagnosis since, although clinically similar, their therapy and prognosis may differ. The clinical presentation with the peculiarities in different age groups, the differential diagnosis, imaging studies, treatment, and prognosis will be the focus of this Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
