

## Special Issue

# Sports Science for Children

### Message from the Guest Editors

Childhood it is all about change. To understand how to seize the opportunities that change offers for the development of children's motor performance, with a lifelong impact, has long been a goal of sports science researchers. In this context, science has progressed a great deal in the last several decades. However, we are also keener to understand the problems and limitations that children, particularly some children, face in their development path. The goal of this Special Issue of *Children* is to highlight recent advances in sports sciences related to this amazing period of childhood. The intended scope of the Special Issue is broad enough to accommodate different areas of expertise and research, as long as they share this common interest in advancing our knowledge on the mechanisms, pathways, and correlates of motor behavior during childhood. We welcome reviews and original research papers, as well as manuscripts identifying gaps in knowledge. We also encourage submissions that explore social and cultural factors, clinical experiences, pedagogical approaches, and methodological essays on the theme.

### Guest Editors

Prof. Dr. Luis Paulo Rodrigues

Escola Superior de Desporto e Lazer de Melgaço, Instituto Politécnico de Viana do Castelo, Melgaço, Portugal

Prof. Dr. Rita Cordovil

CIPER, Faculdade de Motricidade Humana, Universidade de Lisboa, Cruz Quebrada Dafundo, Portugal

### Deadline for manuscript submissions

closed (1 March 2021)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
