

Special Issue

Stabilization and Resuscitation of Newborns: 2nd Edition

Message from the Guest Editor

Annually, approximately 13–26 million newborns worldwide need respiratory support immediately after birth, and another 2–3 million newborns need extensive resuscitation including chest compressions and drug administration. Considering the success and popularity of the Special Issue “Stabilization and Resuscitation of Newborns” previously published in the journal *Children* (https://www.mdpi.com/journal/children/special_issues/Stabilization_Resuscitation_Newborns), we are now releasing a Second Issue aiming to gather original research papers and review articles focused on Newborn Stabilization and Resuscitation. In this Special Issue of *Children*, we focus on recent aspects of neonatal stabilization and the resuscitation of preterm and term infants. Both reviews and original research will be considered for publication.

Guest Editor

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
