

Special Issue

Reviews in Pediatric Dermatology

Message from the Guest Editor

This Special Issue will be a collection of comprehensive, up-to-date reviews from experts in the field on topics of “Pediatric Dermatology” addressing all clinical, experimental, epidemiological, and public health aspects of the broad spectrum of skin diseases in children and adolescents. This includes the review of clinical, experimental, environmental, behavioral, chemical, and genetic data originating from different sources, such as, for example, clinical trials, laboratory investigations, observational epidemiological studies, public health surveys, and governmental/public registers, and their association to dermatological outcomes such as, for example, skin cancer, allergic contact dermatitis, atopic dermatitis, and other skin diseases. Reviews of methodological aspects related to skin health in children from related fields such as biostatistics, epidemiology, data science, bioinformatics, and mathematics are also welcome.

Guest Editor

Prof. Dr. Olaf Gefeller

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
