## **Special Issue**

### Reviews in Pediatric Dermatology

#### Message from the Guest Editor

This Special Issue will be a collection of comprehensive, up-to-date reviews from experts in the field on topics of "Pediatric Dermatology" addressing all clinical, experimental, epidemiological, and public health aspects of the broad spectrum of skin diseases in children and adolescents. This includes the review of clinical, experimental, environmental, behavioral, chemical, and genetic data originating from different sources, such as, for example, clinical trials, laboratory investigations, observational epidemiological studies, public health surveys, and governmental/public registers, and their association to dermatological outcomes such as, for example, skin cancer, allergic contact dermatitis, atopic dermatitis, and other skin diseases. Reviews of methodological aspects related to skin health in children from related fields such as biostatistics, epidemiology, data science, bioinformatics, and mathematics are also welcome.

#### Guest Editor

Prof. Dr. Olaf Gefeller Department of Medical Informatics, Biometry and Epidemiology, Friedrich-Alexander-University of Erlangen-Nuremberg, 91054 Erlangen, Germany
