Recent Advances in Hepatobiliary and Pancreatic Surgery in Children

Message from the Guest Editors

Hepatobiliary and pancreatic surgery have always been considered the domain of general surgeons, but are becoming increasingly common in the practice of pediatric surgeons. We therefore encourage you to publish and share your experience in any aspect of hepatobiliary and pancreatic surgery in children, encouraging the exchange of knowledge among surgeons, as well as pediatricians, pediatric gastroenterologists, and oncologists. This Special Issue is open for papers on hepatobiliary and pancreatic trauma, congenital malformations, acquired diseases, inflammatory diseases, benign and malignant tumors as well as postsurgical complications including post-liver-transplantation problems. We invite papers on the use of minimally invasive surgical techniques including robotic surgery and radiological interventions, as well as intraoperative tools which enhance the safety and effectiveness of surgery.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
