

## Special Issue

# Clinical Gait Analysis in Children: Progress and Relevance

### Message from the Guest Editors

Often taken for granted, skills such as walking, running or other locomotor modes are deemed vital aspects of mobility in children. This special issue focuses on the application of clinical human movement science with an emphasis on biomechanics of locomotion. Main focus will be put on 3 key topics:

- Better detect pathologies and understand their genesis.
- Optimize diagnostics and clinical decisions making.
- Enhance interventions, such as exercises, therapy, orthoses, walking aids, drugs or invasive treatments to alleviate impairments and lower the burden for children.

The spectrum of cohorts may be multifaceted.

Methodological work that demonstrates and optimizes the applicability, accuracy and validity of motion capture technology in the medical context is welcome, too.

While the scope of this special issue is to be diverse, it is mandatory that each publication comments in detail on the added value and benefit of the findings from the perspective of practitioners, caregivers, families and foremost of the pediatric patients' point of view.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

#### Journal Rank:

JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
