New Clinical Evidences in Pediatric Orthodontics and Pediatric Dentistry

Message from the Guest Editors

The enhancement of the clinical management of growing patients has always been a great challenge for orthodontists and pediatric dentists. In this regard, pediatric orthodontics and dentistry aim to provide complete preventative and therapeutic care for kids and teens. Most of the new available technologies and equipment aim to improve patients' experience. New diagnostic and therapeutic tools are available to enhance the diagnosis and treatment plan strategies in orthodontic growing subjects. This care includes diagnosis, treatment, and consulting expertise for newborns, kids, and teenagers of all ages, including those with special care needs. We invite authors to submit original research articles (trials, cohort studies or case-control or cross-sectional studies), literature reviews (narrative or systematic reviews or meta-analyses), as well as high-quality case reports highlighting the above-mentioned topics.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
