

## Special Issue

# Advances in the Epidemiology of Hemostasis Disorders in Children

### Message from the Guest Editors

Hemostatic disorders in children, whether congenital or acquired, encompass a broad and complex spectrum of conditions associated with substantial morbidity and mortality. Beyond classical bleeding disorders—such as hemophilia, von Willebrand disease, platelet function abnormalities and vascular or connective tissue syndromes—disturbances of hemostasis may also manifest as thrombotic or microangiopathic complications, including cerebral or venous thromboses, disseminated intravascular coagulation (DIC), thrombotic thrombocytopenic purpura (TTP) and hemolytic uremic syndrome (HUS). A comprehensive characterization of hemostatic disorders—from neonatal hemostasis to long-term complications of chronic diseases—requires an integrated, multidisciplinary approach involving hematologists, pediatricians, geneticists, immunologists and basic and translational researchers. In this Special Issue, we welcome original papers addressing advances in the epidemiology, diagnosis and management of pediatric hemostatic disorders. Contributions exploring molecular mechanisms, innovative therapeutic approaches and preventive strategies are particularly encouraged.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

#### Journal Rank:

JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
