Current Advances in Pediatric Dental Diseases and Their Treatment

Message from the Guest Editor

Dental diseases are very common in children. They range from caries to malocclusion to include very rare and complex diseases of multidisciplinary interest. The purpose of this Special Issue is to describe and update the therapies of pediatric dental diseases with the most recent research, also including rare dental diseases that require early diagnosis, and systemic diseases with their manifestations in the oral cavity. The prevention that can be carried out on pediatric dental patients is also of great interest. Experimental studies, literature reviews, and case reports are accepted.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
