Special Issue

Advances in Fetal Alcohol Spectrum Disorders (FASD)

Message from the Guest Editor

This Special Issue 'Advances in Fetal Alcohol Spectrum Disorders (FASD)' aims to illuminate the current state of knowledge in research relevant to children with fetal alcohol spectrum disorders (FASD) and their families. Specifically, we invite submissions that advance our understanding of FASD mechanistic insights, prevention, epidemiology, diagnosis, developmental trajectories, and interventions. Given international calls to reduce the harms caused by prenatal alcohol exposure, we also welcome submissions that focus on the policy context and service provision for FASD. We also encourage submissions that consider a strengths-based perspective among children with FASD.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
