

Special Issue

New Challenges of Cyberbullying in Children and Adolescents

Message from the Guest Editor

Cyberbullying is defined as the use of electronic media to cause willful repeated harm to others who cannot readily defend themselves. Prevalence rates of those who are cyber-victimized, perpetrate cyberbullying, or both suggest that cyberbullying is a well-recognized public health issue which affects the physical and psychological health of children and adolescents.

For this Special Issue, we invite authors to submit original research articles and reviews that focus on cyberbullying-related topics. We would appreciate it if you could forward this to your team members and colleagues who may also be interested in the topic.

Please contact us if you have any questions or suggestions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
