

Special Issue

Childhood and Teenage Learning, Lifestyle, Health Factors and Physical Activity in Children

Message from the Guest Editors

We are delighted to launch this Special Issue of *Children*, in which we intend to collect the results of research on the improvement and advances of compulsory education with a multidisciplinary nature. The general titles allow the publication of articles on the early preschool stages (approximately 0 to 6 years, depending on the country), primary education (up to approximately 12 years), and secondary education (up to approximately 12 years). In addition, to flexibility in the age of the research subjects, the research topics can also be diverse and cover the research content of this age group: sports, physical education, motor skills, art, music, children's language, games, health, first aid, or other topics of interest in early childhood and primary and secondary education that are necessary and that may be requested by researchers or academics. Dr. Marcos Calvo

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
