Clinical Advances and Perspectives on Neonatal Surgery—Volume II

Message from the Guest Editor

As we all know, the advancement of diagnostic techniques and surgical methods has enabled many malformations and neonatal conditions to be properly managed. The technical surgical aspects have been implemented together with a more comprehensive knowledge of fetal and neonatal physiology, thus allowing for substantially improved outcomes for many neonatal surgical conditions. Considering the success and popularity of the Special Issue “Clinical Advances and Perspectives on Neonatal Surgery” previously published in the journal *Children* (https://www.mdpi.com/journal/children/special_issues/Advances_Neonatal_Surgery), we are now releasing a Second Issue aims to collect and share the most recent clinical and research advancements in the treatment of those malformations that require prompt and skilled surgical expertise. In this Special Issue of *Children*, senior investigators are welcome to invite mentees and colleagues to co-author submissions under their supervision. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
