

Special Issue

Advances in Pediatric Dentistry and Juvenile Orthodontics

Message from the Guest Editor

This Special Issue involves studies on treating babies, children, and teenagers with a wide range of complex medical dental conditions. Pediatric dentistry is dedicated to the oral health of children from infancy through their teen years. Orthodontic irregularities may be present at birth or develop during toddlerhood or early childhood. Crooked teeth hamper self-esteem and make good oral homecare difficult, whereas straight teeth help minimize the risk of tooth decay and childhood periodontal disease. *Children* is publishing this Special Issue to create a collection of papers on pediatric dentistry and juvenile orthodontics. The aim is to build a community of authors and readers to discuss the latest research and develop new ideas and research directions in this particular field. Papers published in the Special Issue will be collected together on a dedicated page of the journal website.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
