Childhood Arthritis and Rheumatology Research for Dreams Come True Remission

Message from the Guest Editors

Pediatric rheumatic diseases (PRDs) are chronic inflammatory systemic diseases caused by autoimmune responses which develop in childhood and are represented by juvenile idiopathic arthritis, systemic lupus erythematosus, dermatomyositis, Sjögren's syndrome, and autoinflammatory diseases. Nowadays, various biologics and molecular-targeted drugs are available, and remission of PRDs is possible in many children. Besides, the concept of "dreams come true" remission, first introduced by Prof. Takei, is a kind of remission that enables children with PRDs to realize their future dreams without being disrupted by their diseases. This Special Issue invites the latest reviews and original articles in pediatric rheumatology for the realization of future "dreams come true" remission.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
