

Special Issue

Late Effects in Childhood Cancer Survivors

Message from the Guest Editor

I am pleased to welcome you to contribute to this Special Issue on therapy-related morbidity in childhood cancer survivors. The literature to this point has been largely cross-sectional, although hypothesis-driven research, intervention-focused assessments, and the integration of genomics for prediction are becoming more commonplace. It is these latter areas that I would like to focus on as I believe they advance both our understanding of treatment-related late effects and improve our ability to risk stratify, treat, and manage childhood cancer survivors. Manuscripts should refer to key articles in the discipline, but then focus the discussion of the information gleaned from these historical references on how it is being used in current longitudinal studies, intervention-based trials, and basic and translational research. I would envision >5 subject headings/topics for an in-depth review: - Cardiovascular health - Subsequent malignancies - Endocrinopathies and metabolic complications - Neurocognitive risk factors, interventions, and outcomes - Musculoskeletal complications

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
