

Special Issue

Childhood Malnutrition

Message from the Guest Editor

Malnutrition among children and adolescents is a major public health problem. A healthy diet beginning in the early stages of life results in adequate energy and nutrient intake and healthy weight and is crucial for the physical, mental, and cognitive development of children and adolescents, as well as for their long-term health. This Special Issue will explore the genetic and environmental (e.g., lifestyle, psycho-social factors, etc.) determinants of malnutrition in children, focusing on relevant methodological considerations, dietary recommendations, health interventions, and public health policy actions. Various types of articles, such as original research, methodology, and review articles will be considered for publication.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
