

Special Issue

Chronic Illness and Death in Childhood

Message from the Guest Editors

Death and dying have often been treated as experiences distant from childhood, both in policy and practice. Often, in conversations and policy documents, death appears to be a subject pertinent to older age or chronic illness, specifically cancer. However, this Special Issue contributes to a different discourse, which suggests that children may also be confronted with death, not simply as griever but also dying themselves. This Special Issue seeks to bring together current knowledge about the following areas, without being restrictive: childhood death, sibling death, impact of child death, migration and child death, chronic illness in children, terminal stages of illnesses and death, family bereavement following child death, and the professional response to child death. This Special Issue seeks to engage various disciplines, offering a wider view of the subject that will benefit a wider audience. Hence, authors from disciplines like medicine, social care, the social sciences and more are invited to submit manuscripts. Dr. Panayiota Christodoulou

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
