

## Special Issue

# Implementing Pediatric Integrative Medicine in Practice

### Message from the Guest Editor

Pediatric integrative medicine is a growing specialty with great potential to improve children's health. The field combines conventional and evidence-based complementary therapies, is focused on preventive health, and is used by an estimated 12% of children in the US, with higher use seen internationally. As the field has grown, the need for sustainable clinical models has become increasingly important. The goal of this Special Issue is to explore successful models of pediatric integrative medicine in practice in both private and academic settings. Articles on program development, clinical outcome studies, identified challenges and problems solved, billing and coding solutions, policy gaps, and advocacy initiatives are encouraged.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
