Neonatal Health Care

Message from the Guest Editor

There is growing momentum in scholarly activities surrounding neonatal-perinatal health services research, which may encompass epidemiology, disparities, quality measurement, and quality improvement. The growing availability of large administrative and clinical datasets in neonatology have given us the opportunity to explore questions that may not be amenable to traditional randomized clinical trials. There is also an increasing recognition of the value of qualitative methods in order to gather and analyze data that are not available in large datasets. Great progress has occurred in neonatology, both with advances in biomedical science and the integration of quality improvement activities. However, variation in practices and outcomes in our field continue to point to further work that can be done to implement evidence-based practice, and advance safer, more equitable care. We invite you to contribute articles that concern emerging topics in neonatal health care to this Special Issue. Both reviews and original research will be considered for publication.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.
