

Special Issue

New Frontiers in Pediatric Imaging

Message from the Guest Editor

I am happy to invite you to submit your work to a Special Issue “New Frontiers in Pediatric Imaging” in journal *Children*. Pediatric imaging is an area that still has much to be studied, and various techniques including CT, MRI, fMRI, FNIRS etc. can be used. A more detailed diagnosis is possible with these various imaging techniques, and accurate and detailed diagnosis is directly related to the setting of a patient’s therapeutic strategy and a better outcome. As there are many fields to be researched, I hope that more active discussion and sharing of research results will take place here. We believe that the research published in this Special Issue will be helpful to improve the treatment and outcome of pediatric patients. Therefore, we welcome you to contribute to this Issue of *Children*!

Guest Editor

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
