

Special Issue

Orthopedic Disorders in Syndromes

Message from the Guest Editors

This issue will include papers on the evaluation and management of musculoskeletal disorders associated with syndromes excluding classical skeletal congenital diseases such as osteochondrodysplasias. Syndromes often have multidisciplinary medical problems, as well as musculoskeletal abnormalities. When the nervous, cardiac, or renal systems are affected, a quick intervention is often required. The management of orthopedic problems is often overlooked or considered “less important”. However, spine deformities and gait alterations associated with lower limb and foot disorders may be the main problems for these patients. The literature is incomplete regarding orthopedic treatment in these rare diseases, so we have decided to propose this topic. We hope that colleagues could contribute papers that will contribute to the literature and improve the management of these diseases. The aim of this work is to allow a multidisciplinary approach improving the knowledge of the caregivers involved.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
