Special Issue

Multidisciplinary Problems and Research in Pediatric Liver Transplantation

Message from the Guest Editors

Liver transplantation in children became a routine treatment for a wide spectrum of diseases leading to acute or chronic liver failure and/or damage of other organs and systems. There are multiple problems associated with liver transplantation in children: surgical, immunological, complications and co-morbidities, intensive care, infectious, ethical, psychological, and other. All of them are of great importance in achieving progress and better long-term results after liver transplantation in pediatric patients. We are preparing this Special Issue "Multidisciplinary Problems and Research in Pediatric Liver Transplantation" and invite researchers and clinicians from pediatric liver transplantation centers—members of TransplantChild, a European Reference Network with the main goal of having a significant impact on children's quality of life in the long term. One of the ways to achieve this is to promote research, innovation, and expertise in the field of transplantation. Authors from other centers are also invited to contribute to this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.
