

Special Issue

Psychosocial Considerations for Children and Adolescents Living with Rare Diseases

Message from the Guest Editors

Living with a long-term medical condition, particularly if it is a rare disease, can have a profound impact on the lives of children and their caregivers. This Special Issue will explore the psychosocial needs of children and adolescents living with a rare condition and interventions that have been developed to address their needs. We are also interested in research conducted to assess the needs of their family members. Our goal is to update readers on evolving research in the field and familiarize them with useful clinical knowledge and interventions. We invite manuscripts addressing the diverse psychosocial, neuropsychological, and educational needs these children face as well as the impact on their family, friends and community. Help to make this collection even more successful by alerting other experts in the field who could submit their own articles. Simply copy and send the following link to your colleagues:

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
