New Trend in Pediatric Cardiology: Pulmonary Hypertension

Message from the Guest Editor

Pulmonary hypertension is a hot issue in paediatric cardiology affecting all ages, from neonates to adolescents, and significantly impacting morbidity and mortality. Even though our knowledge and understanding of this pathology has increased in the last few years, many aspects need further clarification. Thus, there is a need for additional investigation. This special issue of *Children* will act as a forum to increase understanding of this syndrome, by sharing knowledge about incompletely understood and controversial aspects. Both original research articles and literature reviews will be considered for publication.

Guest Editor

Prof. Dr. Maria Serratto

Division of Pediatric Cardiology, University of Illinois College of Medicine at Chicago, 840 S. Wood St., Chicago, IL 60612-7324, USA

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
