

Special Issue

Tobacco Control in Asian Countries

Message from the Guest Editor

Globally, tobacco use is one of the leading causes of premature mortality, especially low- and middle-income countries. Asia is an important area endangered by smoking. Secondhand smoke (SHS) exposure is an important public health problem resulting from smoking, and children are a vulnerable population who are at high risk for tobacco-related health inequities in tobacco epidemic societies. Approaches to address this problem need to be based on high-quality scientific research to understand root causes and determine effective approaches to reduce tobacco-related diseases. This Special Issue of *Children* will serve as a collection and dissemination platform for discussion **Tobacco Control**. Both reviews and original research publications will be considered for publication. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
