# Cellular and Molecular Biology Insights into Neurodegenerative Diseases: From Pathogenesis to Therapeutic Targets

# Message from the Guest Editors

This Special Issue provides an in-depth exploration of the cellular and molecular intricacies underlying neurodegenerative disorders, focusing on previously unidentified mechanisms and promising drug candidates. This Special Issue also includes a study of cancer pathways, specifically neuroblastoma, to broaden the understanding of misfolded proteins' role in various neurodegenerative conditions. Our primary goal is to investigate molecules capable of addressing pathologies arising from protein aggregates, which trigger chronic reticular stress. Through this multidisciplinary approach, this Special Issue aims to unveil novel therapeutic avenues for treating neurodegenerative diseases and neuroblastoma, potentially bringing new hope to patients and clinicians.

# **About the Journal**

# Message from the Editor-in-Chief

## Editor-in-Chief

## Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago, Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140, New Zealand

# **Author Benefits**

# **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PMC, PubMed, Embase, CAPlus / SciFinder, FSTA, AGRIS, and other databases.

# **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

# **Recognition of Reviewers:**

APC discount vouchers, optional signed peer review, and reviewer names are published annually in the journal.
