The Role of Bioactives in Inflammation, 2nd Edition

Message from the Guest Editor

An inflammatory response is a complex physiological defense mechanism of the body against harmful stimuli. However, a prolonged, excessive inflammatory response may damage the body in the long term and lead to chronic diseases. Recent studies suggest that natural bioactives play a crucial role in inflammation and disease, helping reduce the risks associated with inflammatory diseases, improving the state of wellbeing, and even improving the quality of life. Furthermore, different research models and methodologies can demonstrate the effectiveness and explain the biological mechanisms of such bioactives for inflammatory diseases. In this Special Issue, we welcome articles highlighting the current status of anti-inflammatory compounds, natural products, synthesized compounds, novel mechanisms, and targets of anti-inflammation.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Molecular Medicine, University of Otago,
Christchurch 8140, New Zealand

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC, PubMed, Embase, CAPlus / SciFinder, FSTA, AGRIS, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names are published annually in the journal.
