

## Special Issue

# Synthesis and Theoretical Study of Bioactive Molecules

### Message from the Guest Editor

Not all synthesized compounds exhibit biological activity. Therefore, biological evaluation of synthesized compounds is required, which is unfortunately expensive and time-consuming. To avoid such problems, theoretical studies exploring molecular mechanics, docking, and molecular dynamics can provide info on the physicochemical properties of a compound and its binding interaction with the expected target receptor. Therefore, this Special Issue focuses on the synthesis of bioactive molecules and theoretically studying their binding with target receptor by using different computational tools.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago,  
Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140,  
New Zealand

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC,  
PubMed, Embase, CAPus / SciFinder, FSTA, AGRIS, and  
other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 17.8 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the first half of 2025).

##### Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and  
reviewer names are published annually in the journal.
