

## Special Issue

# Tumorigenesis and Tumor Microenvironment

### Message from the Guest Editor

In this special issue, we seek articles and reviews that bring new insight advancing our understanding of Tumorigenesis and Tumor Microenvironment and bring together diverse perspectives and groundbreaking discoveries in the field. We invite researchers to submit articles and reviews with focus on emerging therapies, targeting the tumor microenvironment, and molecular pathways of tumorigenesis, with the aim to develop biomarkers, or early diagnostics or effective cancer treatments including, the role of immune cells, stromal cells, extracellular matrix, and signaling pathways in promoting or inhibiting tumor growth, progression, and metastasis are the target for this special issue.
