# Mesenchymal-Stem-Cell-Based Therapeutic Strategies via Extracellular Vesicles

### Message from the Guest Editor

Mesenchymal stem cells (MSCs) have garnered significant attention for their therapeutic potential, which appears to be largely mediated through their paracrine activity and the secretion of extracellular vesicles (EVs). MSC-derived EVs have emerged as promising therapeutic agents in their own right, exhibiting a range of beneficial effects in various disease models. Many searches result highlight the significant therapeutic potential of MSC-derived extracellular vesicles and the various strategies being explored to enhance their clinical utility for the treatment of a wide range of diseases and injuries.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago,  
Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140,  
New Zealand

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC,  
PubMed, Embase, CAPus / SciFinder, FSTA, AGRIS, and  
other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 17.8 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the first half of 2025).

##### Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and  
reviewer names are published annually in the journal.
