

## Special Issue

# Focus on Molecular Basis of Cardiac Diseases

### Message from the Guest Editor

The diagnostic and therapeutic options in cardiovascular medicine are continuously improving. While the ability to help and protect patients using different devices has massively improved in recent years, risk stratification remains very difficult. Stepwise approaches combining different modalities such as ECG, imaging modalities and cardiac biomarkers are therefore of eminent importance. Furthermore, molecular pathways of many cardiac diseases and the modes of action of new drugs involved in cardiac metabolism have to be further elucidated. In this Special Issue, we invite researchers to submit their work highlighting new pathways in cardiac metabolism explaining drug or intervention effects as well as biomarkers improving risk stratification for cardiac diseases, such as the development of arrhythmias or sudden cardiac death. All kinds of evidence are welcome, with the exception of case reports.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago,  
Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140,  
New Zealand

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC,  
PubMed, Embase, CAPus / SciFinder, FSTA, AGRIS, and  
other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 17.8 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the first half of 2025).

##### Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and  
reviewer names are published annually in the journal.
