

Special Issue

Molecular Research of Urological Diseases

Message from the Guest Editor

The urogenital system and its development have always been hot topics in the field of molecular biology, especially the urogenital developmental pathways in related mouse models, such as the Wnt and Notch pathways. In addition, the study of the apoptosis mechanism of some anticancer drugs in urogenital cancer cells to improve cancer treatment is also a key topic in this Special Issue and its related fields. The study of basic molecular tests, such as RT-qPCR, Western blot, IHC, FACS, ChIP and basic bioinformatics in the research and application of urogenital diseases is welcomed by this Special Issue. We hope that researchers can translate the discoveries of molecular biology in the laboratory into innovative diagnostic tools and treatments in the field of urogenital development and diseases.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago,
Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140,
New Zealand

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC,
PubMed, Embase, CAPus / SciFinder, FSTA, AGRIS, and
other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 17.8 days after
submission; acceptance to publication is undertaken in 2.7
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and
reviewer names are published annually in the journal.
