Molecular-Based Approaches in Therapy for Gastrointestinal Cancers

Message from the Guest Editors

Accumulated fundamental knowledge testifies multiple complex molecular mechanisms in oncogenesis that determine characteristics of disease progression and affect tumor responses to therapy. Tumor heterogeneity is a fact. Single attempts of cancer clustering using molecular and genetic approaches are adequate, but they are not applied in practical oncology. Increasing the effectiveness of antitumor measures is a significant task in practical oncology. New techniques, targeted drugs, and chemotherapy regimens are not always successful due to inherited or acquired resistance to anti-cancer therapy. There is insufficient knowledge about molecular-based approaches in anti-cancer treatment. The main goal of the Special Issue is to summarize practical molecular-based methods in the therapy of gastric and colorectal cancers.

Guest Editors

Prof. Dr. Irina V. Kondakova
Prof. Dr. Liudmila V. Spirina
Prof. Dr. Natalya V. Yunusova

Deadline for manuscript submissions

closed (31 January 2023)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Molecular Medicine, University of Otago,
Christchurch 8140, New Zealand

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC, PubMed, Embase, CAPlus / SciFinder, FSTA, AGRIS, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names are published annually in the journal.
