### **Special Issue**

## Innovations in Marine Biotechnology and Molecular Biology

#### Message from the Guest Editor

In comparison to terrestrial animals, marine biotechnology and marine molecular biology are not well developed. This includes, but is not limited to, in vitro long-term cell culture of marine animals, efficient gene transfer and expression tools, CRISPR/Cas9 gene editing technology, genetical manipulation and application of functional target genes with merit traits, etc. In this Special Issue, we seek articles and reviews that bring new insights, diverse perspectives. groundbreaking discoveries or innovations, and new tools or modified tools that can promote our understanding and application of marine biotechnology in marine animals, algae, and microorganisms. We also want to thank Dr. Dongmei Wang for her contribution to and support for the proposal, promotion, processing, and development of this Special Issue.

### **About the Journal**

#### Message from the Editor-in-Chief

#### Editor-in-Chief

#### Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago, Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140, New Zealand

#### **Author Benefits**

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PMC, PubMed, Embase, CAPlus / SciFinder, FSTA, AGRIS, and other databases.

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

#### **Recognition of Reviewers:**

APC discount vouchers, optional signed peer review, and reviewer names are published annually in the journal.
