## **Special Issue**

### Hyperlipidemia and Molecular Mechanism in Human and Animals

#### Message from the Guest Editor

Dear colleagues, Maintaining lipid profiles such as high density lipoprotein and total cholesterol is essential to health not only human but also in animals. The aim of this special issue is to investigate the molecular mechanism of hyperlipidemia related genes and proteins such as ApoA-1 which is related to high density lipoprotein expression and to review the effect of diet and medicaiton, and environmental factor to gene expression. Using the techique of metabolomics. metabolic biochemstry to investigate is welcome. We also welcome novel biomarker for ealry diagnosis and monitoring of hyperlipidemia related disease. Submissions are welcome on wide range of hyperlipidemia related endocrine disease such as diabetes mellitus, Cushing's disease, pancreatitis, gall bladder mucoceles.

### **About the Journal**

#### Message from the Editor-in-Chief

#### Editor-in-Chief

#### Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago, Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140, New Zealand

#### **Author Benefits**

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PMC, PubMed, Embase, CAPlus / SciFinder, FSTA, AGRIS, and other databases.

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

#### **Recognition of Reviewers:**

APC discount vouchers, optional signed peer review, and reviewer names are published annually in the journal.
