The Role of Neuroinflammation in Neurodegenerative Diseases

Message from the Guest Editor

Neuroinflammation, characterized by the activation of glial cells and the release of inflammatory mediators, has emerged as a key player in the pathogenesis of disorders such as Alzheimer's disease, Parkinson's disease, and multiple sclerosis. This Special Issue will bring together cutting-edge research that elucidates the molecular mechanisms driving neuroinflammation, its impact on neuronal function and survival, and the potential for targeting these pathways in therapeutic strategies. Contributions will include original research articles, reviews, and perspectives that address how neuroinflammatory processes influence disease progression, and the development of novel biomarkers and interventions. This Special Issue aims to foster a deeper understanding of neuroinflammation's role in neurodegeneration, paving the way for innovative treatments that could alter the course of these debilitating diseases.

Guest Editor

Dr. Wenqiang Fan

Department of Neuroscience, UCB Biopharma SPRL, 1420 Braine-l'Alleud, Belgium

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Molecular Medicine, University of Otago,
Christchurch 8140, New Zealand

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC, PubMed, Embase, CAPlus / SciFinder, FSTA, AGRIS, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names are published annually in the journal.
