

## Special Issue

# Emerging Trends in Nanobiotechnology and Nanomedicine

### Message from the Guest Editors

We are pleased to invite you to contribute to our next Special Issue on the 'Emerging Trends in Nanobiotechnology and Nanomedicine'. This Special Issue aims to highlight the most recent advances in the application of nanotechnology in the areas of molecular biology and medicine. Areas of research may include the following:

- Functionalized nanocarriers for site-specific delivery of drugs, peptides, monoclonal antibodies, enzymes, hormones, antigens, and cytokines.
- Promotion of the bioavailability of oral, skin, mucosa, and other tissues.
- Development of nanoparticles (polymeric, lipid, metallic, ceramic, composite), liposomes, niosomes, polymeric micelles, nanoemulsions, and nanofibers containing biotechnologically active compounds and drugs for combined therapy.
- Nanotheranostics for obtaining images and treating diseases.
- Nanofibers containing biomolecules and drugs for tissue engineering and regeneration.
- Assessment of biocompatibility and safety of materials for transactional research and clinical use.

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC, PubMed, Embase, CAPlus / SciFinder, FSTA, AGRIS, and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).

##### Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names are published annually in the journal.
