

Special Issue

Aging, Age-Related Changes in the Brain and the Progression of Alzheimer's Disease

Message from the Guest Editor

This Special Issue will concentrate on the aging process in in vitro, animal, or human models, the resulting changes in cellular and molecular levels, structural and functional changes of proteins, lipids, genes, enzymes, and their relationship with the development of Alzheimer's disease (AD). As glycative stress, oxidative stress, and ER stress are reported to be elevated with age, this elevation may accelerate the progression of AD. Amyloid-beta production, deposition, and plaque formation may not be the only reasons behind the progression of AD, as there could be other proteins responsible that are unknown so far. Most often, we focus on the upregulated genes, but the downregulated genes may be the cause we usually neglect. Environmental factors, pollutants, food habits, lifestyle, alcohol consumption, and smoking could accelerate or slow down AD pathogenesis. We are still searching for the best lifestyle to avoid or slow down AD.

This Special Issue welcomes original research or review articles focused on the cellular and molecular events upon aging that promote the onset and advancement of AD.

Guest Editor

Dr. A. N. M. Mamun-Or-Rashid

Department of Environmental and Occupational Health, University of Pittsburgh, Pittsburgh, PA 15261, USA

Deadline for manuscript submissions

closed (31 December 2022)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago,
Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140,
New Zealand

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC,
PubMed, Embase, CAPus / SciFinder, FSTA, AGRIS, and
other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 17.8 days after
submission; acceptance to publication is undertaken in 2.7
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and
reviewer names are published annually in the journal.
