Bioactives and Inflammation

Message from the Guest Editors

An inflammatory response is a complex physiological defense mechanism of the body against harmful stimuli. However, a prolonged, excessive inflammatory response may damage the body in the long term and lead to chronic diseases. Recent studies suggest that natural bioactive plays a crucial role in inflammation and disease, helping to reduce the risks associated with inflammatory diseases, improving the state of wellbeing, and even improving the quality of life. Furthermore, different research models and methodologies can demonstrate the effectiveness and explain the biological mechanisms of such bioactives for inflammatory diseases. In this Special Issue, we welcome articles highlighting the current status of anti-inflammatory compounds, natural products, synthesized compounds, novel mechanisms and targets of anti-inflammation.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago,
Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140,
New Zealand

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC,
PubMed, Embase, CAPus / SciFinder, FSTA, AGRIS, and
other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 17.8 days after
submission; acceptance to publication is undertaken in 2.7
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and
reviewer names are published annually in the journal.
